A WARM WELCOME TO TRITON SIGNAL USA'S 2024 PRODUCTS CATALOG

Triton Signal USA is currently celebrating its 15th year of business, we are grateful for the continued, loyal support of our customers.

Our company's mantra is "Rapid development and introduction of industry-leading products, at a fair price", and last year was no exception, as we developed a host of new products, spurring the need for this latest products catalog.

A new development in vehicle warning lamps, is the use of green and amber/green strobes, these are being adopted by several states as more visible than amber and are being led by snowplow and salt truck equipment. In line with our mantra of "Rapid development of industry-leading products, at a fair price", we have recently added around a dozen green or amber/green strobe products.

Triton Signal USA is proud to be a market leader in our field, we are intensely focused on supplying the highest quality, most rugged and durable products, with unique and patented features. In a crowded market, with a myriad of product choices, we are confident you'll find that our world-class products and service stand out from the rest.

All of us on the Triton team appreciate your interest, continued patronage and support.

Sincerely, Mark T. Coward, President.
